FULLTEC

Description

FULLTEC ARROW

Fulltec Arrow is a premium nutritional complex, recommended to enhance floral retention and photosynthetic capacity during the reproductive phases of the crop. Its balanced formulation provides Ca, B, Zn, N, K and Mg in addition to special compounds that contribute to the quality of pollination, in addition to increasing the plant's tolerance to abiotic and biotic stresses that may occur during this phase.

Plant Defense: Its premium formulation allows rapid response of plant defense mechanisms against adversities, improving the stability of the cell wall and optimizing performance in the reproductive phase of the crop.

More Flowers, More Productivity: Provides macro and micronutrients that contribute to the germination and viability of the pollen grain, greater speed of pollen tube formation and flowering fixation, resulting in a greater quantity of viable flowers.

High Compatibility: Chelated and complexed nutrients allow greater stability in the preparation of the syrup, resulting in efficient physiological and nutritional results in flowering and productivity.

Benefits

HIGHLY COMPATIBLE
WITH PESTICIDES

SYNERGISTIC
EFFECT

LOWER LOSSES DUE
TO ABIOTIC STRESS

HIGHER PROFITABILITY

GREATER FLORAL RETENTION,
MORE PODS, MORE PRODUCTIVITY

IMPROVES GRAIN
QUALITY

ACTIVATES THE NATURAL DEFENSE
MECHANISMS OF PLANTS

RATES AND HOW TO USE

Reproductive Phase

Rates: 4 -6 fl oz/acre

Biodegradable products are easily decomposed by natural bacterial action, not remaining in the environment. In laboratory tests, this product showed complete biodegradability, being classified as 100% biodegradable. Spraytec defends sustainable agriculture and contributes to reducing waste and pollution of soil, water and air.
