

FULLTEC CUBE IR

TECHNOLOGY TO PROTECT YOUR CROP

spraytec
FULLTEC

Description

Fulltec Cube IR has a high-tech liquid formulation and compatibility with pesticides. It promotes balanced nutrition, and acts on the physiological processes of natural defense of plants, stimulating the creation of physical and chemical barriers, which hinder the development of pathogens in plant tissues.

Fulltec Cube IR enhances the natural defense of your crops, providing greater productivity and profitability.

Benefits

Activates the natural defense mechanisms of plants;

Greater tolerance to diseases;

Highly absorption and translocation nutrients;

Quality nutrition for your farm;

Reduces biotic and abiotic stress;

Greater productivity and profitability;

Highly compatible liquid formulation;

High synergy with pesticides.

Mn

S

Cl

Carboxylic
Acid

Natural Plant Defense

Activation of plant defense mechanisms, inducing the plant to synthesize high concentrations of secondary metabolites, such as lignin (physical protection), phytoalexins and RP proteins (biochemical protection).

Balanced Nutrition

Nutrients with high absorption and translocation in plant tissues, contributing to the enzymatic activation of plant defense proteins.

Application Technology

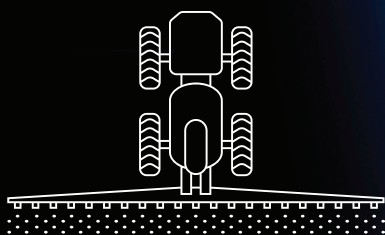

It has a liquid formulation, with high solubility and compatibility with pesticides, providing high operational performance, preventing clogging of nozzles, filters and sieves.

APPLICATION PERIODS

Vegetative and
Reproductive

RATES

4 oz. per acre

Biodegradable

Biodegradable products are those that easily decompose due to natural bacterial action, that is, they do not remain in the environment. In laboratory tests, this product showed Complete Biodegradability, being classified as 100% Biodegradable. Spraytec defends sustainable agriculture and contributes to reducing waste and pollution of soil, water and air.
